maximum speed

1,5 m/min

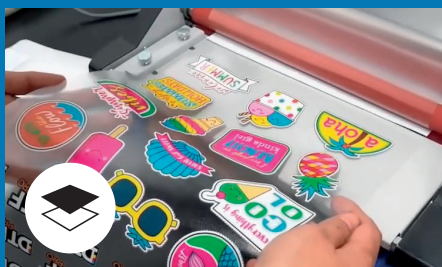

IDEAL FOR
UV-DTF

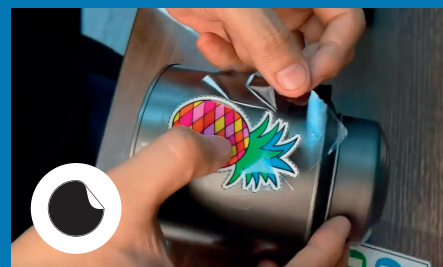

High quality UV printing

Laminated with a special PET film

Easily apply to any material!

XL350 Easy

DESKTOP HOT LAMINATOR

www.xlam.biz / info@xlam.biz

Unique features!

Hot roll-to-roll pneumatic laminator 350 mm. Complete with rewinder. **Silicone roller (heated) maximum temperature 180°C**. Material thickness up to 1,2mm.

Quick and easy to use, it allows you to save labor and improve productivity by increasing the quality of your work. You can also laminate from both the sides (**encapsulation**).

High efficiency

No creases or bubbles, it guarantees excellent results even at temperatures below 180°C. Ideal for laminating single sheets, **particularly useful in the UV-DTF process** where it is necessary to couple the film to be transferred.

Guaranteed safety

The emergency stop button is clearly visible on the top side. Thanks to the safety blocks placed on all the poles there is no risk of involuntary movements of the supports.

Product code

XL350E

Main roller diameter

30 mm

Packaging

anti-shock in rigid cardboard

Maximum lamination film width

350 mm

Roller handling

electrical

Machine size (l x h x p)

620 X 280 x 300 mm

Maximum material thickness

1,2 mm

Feeding

manual

Packaging size (l x h x p)

640 X 340 x 370 mm

Maximum temperature

180 °C

Take up system

included

Machine weight / Packaging weight

13,5 kg / 15 kg

Minimum - maximum speed

0,1 - 1,5 lmt/min

Heating method

internal with resistance

Safety

CE certification

Temperature / speed control

Micro Control

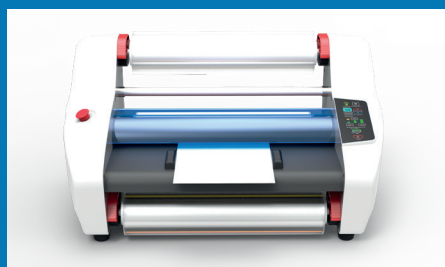

Maximum power / voltage

640 W / 220-230 v - 50-60 hz

Warranty

12 months

Simple and compact ✓

Swinging work surface ↑

Safety locks on the poles 👍
